

### Care & Maintenance Instructions

- The panels are only suitable for internal use on walls and ceilings.
- Panels must be stored indoors.
- Do not expose panels to temperatures exceeding 60 Degrees C.
- Slight variations in shade may exist, it is advisable to mix profiles from different packs prior to installing.
- **Do not use cleaning products that contain abrasives or bleach when cleaning.**
- **It is advisable to wipe down excess water using a soft, dry cloth to prevent any discolouration.**
- **Do not apply adhesive tape or masking tape to the surface of the panel.**
- **Use only SOLVENT FREE adhesive or neutral low cure modulus silicone during installation.**
- If installed to a false ceiling or using to create false ceiling ensure sufficient gap of 100mm minimum to allow heat disperse and prevent panels distorting.
- To make panels watertight in a shower are run a bead of silicone into the groove before slotting in next panel, this prevents water penetration between panels.
- If not using sealing trim on bath or shower tray, fit panel end onto a bead of silicone on surface of bath or shower tray seal.
- Keep out of direct sunlight and rainwater.

**FAILURE TO FOLLOW THE ABOVE WILL INVALIDATE GUARANTEE.**
