Kalsi Group (UK) Ltd; well-established Manufacturing company (over 30 years) Head Office in Birmingham have a fantastic opportunity for a Maintenance Engineer.

The company is a leading manufacturer within their field. Having recently gone through restructuring and expanding, this is a great time to get on board and play a key role in our future.

Position Purpose:

Preventative and reactive maintenance of all machines.

Primary Duties and Responsibilities:

- Mechanical and electrical maintenance of all production equipment on-site to include injection moulding machines, tool room equipment, ancillaries and others machines/equipment where required.
- Fault finding on plc's Siemens S5 & S7 Mitsubishi
- Carry out root cause analysis to pre-empt potential equipment failure.
- Carry out planned maintenance on all equipment and record details on a Maintenance software system
- Liaise with production for downtime slots to carry out repairs.
- Source new parts.
- Respond to daily breakdowns and record details on a Maintenance software system
- Recommend and implement improvements to reduce downtime.

Skills / Knowledge

- Extrusion Plant, Mixing Plant
- Able to be licensed to operate a forklift, pallet jack, overhead crane hoist, cherry pickers, scissor lifts etc. – we will train.
- Able to safely operate handheld and stationary power tools.
- Able to work safely with sharp and heavy objects.
- Physical job requirements, reaching, bending, grasping and working in confined spaces.
- Able to use a computer (familiar with Microsoft packages) and Maintenance software packages
- Able to read and write in English and do basic arithmetic.
- Able to read and translate hydraulic drawings.
- Able to read and translate electrical drawings.
- Good time management is essential and the ability to respond to rapidly changing priorities.
- Good problem-solving skills.
- Must be punctual and have good attendance.

- Able to comprehend and follow printed and computer-screen instructions, and direction from supervisors or technical leads. Good written and oral communication skills.
- Strong attention to detail.
- Previous experience as all-rounder maintenance engineer within an injection moulding working environment.

Qualifications:

- Previous experience in mechanical and electrical engineering.
- Fully Qualified maintenance Engineer
- 17th or 18th Edition Wiring regulations certificate preferred.

Work Environment:

Nonsmoking; production; eye protection & safety shoes required.

Job Types: Full-time, Permanent

- Standard working week is 42.5 hours per week: from 9am – 6pm, Monday – Friday.

We offer a competitive salary depending on experience.

Benefits:

Workplace pension after 3 months

20 days holiday plus 8 days bank holidays
